

Professional Water Soluble Fertilizer

10-52-4

Fish Pond Fertilizer

PRODUCT DESCRIPTION:

Ideal high phosphate blend that fertilizes the phytoplankton bloom in the pond. This product feeds the microorganisms (such as phytoplankton, filamentous chara, and nitella) which are the continual food source for the aquatic insects and small fish in your pond. It is 100% water-soluble and disperses in the pond water instantly!

GUARANTEED ANALYSIS:

Total Nitrogen (N)	10%
10.0% Ammoniacal Nitrogen	
Available Phosphate (P ₂ O ₅)	52%
Soluble Potash (K ₂ O)	4%
Sulfur (S) Combined	1.66%

DERIVED FROM:

Potassium Sulfate, Ammonium Phosphate

Usage Instructions:

Apply at the rate of 4 pounds per surface acre of water with aquatic applicator.

Begin applications in late February to early March when water temperature is between 60-65 degrees F. At two week intervals, make applications for next month, or until phytoplankton bloom is established. Then once every three weeks for nine weeks to maintain the bloom. Applications may be made monthly thereafter until end of October.

WARNING: Using a Secchi Disk, measure light penetration. Once reading is 18 to 24 inches, stop fertilization.

Warranty: Warranty of this product implied, is limited to the guaranteed analysis on this label, in as much as misuse is beyond sellers control. Likewise, seller is not liable for any injury to living things, crops, soils, or materials which may result from the use of this product.

**FOR PROFESSIONAL USE ONLY.
KEEP OUT OF REACH OF CHILDREN.**
